Protecting the Environment

Dear Parent/Carer

This half-term holiday, Ellenbrook School Council are calling on your children to take protecting the environment into their own hands, we would be grateful if you could please share the following information with them:

If you only have a short amount of time to spare, your mission is to create a poster which features a memorable animal character to persuade people to recycle more, and recycle better.

If you are feeling more creative, your mission is to create a film to educate grown-ups about how recycling can help the world we all share. You can work on your own, or with a group of friends (up to four people in total). Your film must feature one or more memorable animal characters made of recyclable materials to persuade people to recycle more, and recycle better. It must be no longer than three minutes and must not include any person's face or name nor must it include music or photos that don't belong to you.

Once your mission is complete, bring it into school and we will upload it on 'The Action Pack' website for us to be in with a chance of winning some amazing eco-friendly prizes. In addition, favourite submissions will also get published on the Action Pack gallery page <https://schools.recyclenow.com/gallery/>.

Get creative, we are excited to see your amazing characters.

Kind regards

Miss N Mottram
School Council Lead
